Gumwood Nurseries

Growers of All Kinds of

FIELD-GROWN ROSES

Founded in 1919 by P. T. Shamburger

WINONA, TEXAS

These rose bushes are all two years old, field grown and budded on low on de-eyed under stock. This prevents suckering out from below the bud. Do not confuse our bushes with lower grade bushes advertised by so called dealers. Our bushes are as good as any you can get regardless of price. We grow all these roses and do not depend upon some one else to get them for us.

We know that you will be pleased with the bushes you get from us. Thanking you in advance for a trial order.

GUMWOOD NURSERIES

PLANTING INSTRUCTION

When you receive your plants see that the roots are moist and keep them that way. These plants will be pruned ready for planting. Plant so that the crown is even with top of ground. Water thoroughly every 2 or 3 days for first week, then maintain a good growing moisture. Plant where they can get a good supply of sunlight. Keep grass from choking out roses. Do not let any fertilizer come in direct contact with the roots. Rotted dairy manure is excellent fertilizer.

ORDER EARLY. All plants are postpaid.

ROSE BUSHES

- American Beauty—A large deep red HP which blooms very freely.
- Ami Quinard—Very dark red opening to almost black.
- Antoine Revoire—One of the most beautiful silvery pinks.
